

News Release- August 16, 2015

The North American Development Bank selects AltBridge Capital Partners founder as one of their project expert risk advisors.

Philip F. Alfieri was selected by the North American Development Bank (NADB) as one of their Expert Risk Advisors for their sustainable infrastructure development projects. The NADB is a bi-national financial institution capitalized and governed equally by the Federal Governments of the United States of America and Mexico for the purpose of financing environmental projects.

The advisors are expected to identify and report any financial issues and challenges with the project presented for review, as well as any suggested risk prevention or mitigation measures that should be taken projects as part of their Funding Committee approval process.

Under its charter, NADB is authorized to finance projects that will prevent, control or reduce environmental pollutants or contaminants, improve the drinking water supply, or protect flora and fauna, so as to improve human health, promote sustainable development, or contribute to a higher quality of life. In this context, NADB may finance the following types of projects, including but not limited to water, waste management, cleaner & renewable energy, air quality, industrial/hazardous waste and energy efficiency
